Question

would you guys make for your barbecue?

This burgers brought worse. The ribs. My grandmother made some like pasta, salad, corn, all kinds of thing. Thanks. We have beans and whatnot. It was quite good.

Question:

Do you wanna just start off by kind of giving me a rundown of your elementary school years to middle school years and, like, what that was like and growing up and stuff? Just give me a little rundown of like, wow, you grew up in s everything.

Anthony Moore 00:56

I can do that. So I grew up. With my single mother. And we grew up in San Diego, primarily living with my grandparents, who I live with now. And across the street from my grandparent's house, there is Johnson Elementary School. It's a magnets. It's a magnet school. And my grandmother works there as a cafeteria lady, and she still does what she did when I was going there. She still does. And I went there in elementary when I from. From all the way through elementary, some first to fifth grade.

I left Johnson and then I went to Clay Elementary. It's like it's in San Diego as well. I forget the area, but this is the elementary school I went for 5th grade. And I was a, I wasn't the best kid in elementary. To. I get in trouble a lot, mostly because I would always finish my work pretty quickly. And I talking class and. I just talk and, and pretty and make a decent distraction. So my mom would get called and like, oh my God, your son just talking. And I'm like, well, he finishes work. I he's talking, but he did it. He did his work. So that be the reason why I get in trouble is that I, I just, I've been work really fast and I just start talking and in middle school, I got in trouble

a lot less for that kind of stuff cuz I was, it got a little more challenging, but I was still pretty. That's my work got done.

Anthony Moore 02:35

But my sister, LA Sean has autism and we, she is a great, but like older than me, or was when we were going to school together. So I was in 6 grade, 2 in seventh grade. And from time to time, again, a lot of kids would pick on her, bully her. So I would, I'd be the person with my sister, right, to send out my sister and every now and then led to a fight or two. But the school staff understood that I was a good kid. I just sometimes things got. A little rough with remain the Sean. So I was mostly a good kid, but I ran to a few things when I was a middle school.

Anthony Moore 03:11

11 school and in high school? Well, well, in middle school, I went from six grade to 7th grade. And I went to purging middle, which is like in. Oh, my God. What's that area? Oh, my God. I don't have my tongue. It's like Santa something, but it's a. It's like a little Lamesa, I think. No, it's near Cow's Mountain. Whatever Cow's Mountain is right there.

Anthony Moore 03:37

Lake Murray. It's there. Isn't like very. So I went to Pershing Middle in Lake Murray. That's kind of where I found that I like music a lot. When I was in secure, I was inquire, but in 7th grade, I someone do something music wise, but I just didn't I didn't want to buy anymore.

Question:

So do you still do music or no?

Anthony Moore 03:57

So now I just kind of played bass guitar on my side I my primary school. But I do feel like that music is a great. Hobby. And I think that everyone should probably, like, try to flex that muscle when they can. So I played bass guitar on the side, but when I was in middle school, I picked up the cello and that's was kind of my main thing in middle school.

Anthony Moore 04:18

I was a cello player and I was like the main cheers. I got all the solos and stuff. So that's, remember, mostly from middle school was me playing the cello a lot and.

Anthony Moore 04:30

Leaving middle school and high school, I had a lot of family issues going on and my mom couldn't really be around to take me to high school like that. Eh, the ones that were in my immediate area were not the best. Schools and my family went to high schools and they didn't really, it didn't wasn't really a good turnout for them. So my mom just or enrolled me into an

online charter called Altis. Tools. So it'd be like I'd have an office that I go into maybe three times a week for, like, two hours. But for the most part, my curriculum would be online. So it was really up to me to the hunker down and to study. Cuz no one was really watching me. I'd have, like, a little teacher who would like, hey, your progress, whatever. But it wasn't like. I wasn't getting up and going to school that much. I wasn't. Like, it was mostly me and my mom wasn't too crazy around to my progress. So it was really up to me to make sure that I got my work done. I hated that school a lot.

Anthony Moore 05:32

It just. No, I know. Rush curriculums, no clubs, no activities, just solid work. I value the ethic you gave me, but I would have preferred to go to regular high school. But everything turned out pretty fine. I graduated and I left that school proudly. And now I'm here in college.

Question:

But can you tell me a little bit about your mom and yours relationship?

Anthony Moore 06:22

Me and my mom. She is a single mother. So growing up and even like in my teenagers, I, I kind of grew some resentment or against her when I was maybe in high school, like a little after high school cuz I was just really upset, like, why don't I get to have whatever other people have and what not. My mom is always been like a kind of person who loves me to death. But the challenges of living in poverty and like having not the best mental health, being a single mother of 3 kids, I didn't really realize it is not really easy. I have like three kids in that situation. So now. Nowadays, me and her, we communicate back and forth. She lives up in. She lives in mirror. It now. And I love my mom, but I also, I hold her for her own, like things she got going on. So it's like a left from a distance, but also like, I love you and my mom, but also like, I need to take care of myself as well we're.

Question:

What about your sister? You said she is autism, right? So how was dealing with having a sibling with autism? Did you ever feel you had to step up and kind of be like a, like a leader to her or like a safety net or anything?

Anthony Moore 07:48

So I have two older sisters. Jordan Lasean has autism. And my mom always also like, oh, you're the, you're the, you're youngest older brother. And I'm like, kind of, cuz I've always, I kind of had to like, and not had to as. Oh, I had to I, I semester. So it's it comes it's like a notion.

Anthony Moore 08:06

It's like a no data to me, right? I have to look out for her and help her out. She communicates very differently than most people. Whenever she's like she's upset or sad, she's really quiet. Really back office. And I have to kind of like, I understand how to communicate her cuz I grew up her. There'll be times where the Sean will have a bit of an episode and I'll have to, like really get on her level, cuz very few people in her life kind of know how to sit down and talk with her. And they get frustrated and they respond, storm off and whatever.

Anthony Moore 08:42

But I understand on how she communicates. She's older than me, so I try to hold her to that adult standard, but also understand like she has challenges and she's just trying her best and it, ever since I was a kid, I, I, I've, if. About the need to stand up for the Sean. But it isn't more of like, oh, I have to with more like, that's my sister, no da.

Question:

how would you give someone advice? Say someone has an autistic sister or an autistic sibling and they're kind of just struggling with it. What advice would you give to someone who's dealing with that?

Anthony Moore 09:47

Well I just say that like being your divergent, like. In my opinion, everyone thinks a little differently. Everyone thinks and acts a little differently. Everyone has different ways of perceiving of the world, and no one way of thinking is right or wrong. And I see the same thing with Sean. And she is so smart, but she just takes a little more time or she looks at it differently. The most people, and I see that people who make fun of that type of process just aren't mature enough to understand that we all think differently as humans, such as how it is, you know, in the Sean. Just more of the most people, my best friends, autistic. And he thinks differently most people as well. But he's also super duper smart. And so it has nothing to do with intelligence. It's all to do with how we perceive things and we operating differently. I maybe I'll look at something very different than you do, that just kind of how people work. And I just see autism as just like that, just of different way of seeing things.

Anthony Moore 10:52

Then I don't think that anyone should. We put down for thinking a certain way, cuz. That just. I thought people who are original. How they're made. People who are innovative, they think they see things in a different light. And words do hurt. Contrary to popular belief, words do hurt. But you have to understand that some people just aren't mature enough to grasp the idea that people think differently. And you shouldn't let them put you down because you just, you have a certain way of you being the world and that's okay.

Question:

How's the your major? How's that going? Like, how's school and homework and is it a lot? I feel like I'm dealing with that, too, right now or.

Anthony Moore 11:40

Something like I could talk all day, but my major in the career that I wanna go in. To my major currently is interesting cuz I'm more concerned about what I want to transfer over to. So I wanna career in data science. I want to database inquiry. So right now. I'll end up leaving my call with the Associates in mathematics for transfers so I can transfer over to university and applied mathematics with the concentration.

Anthony Moore 12:12

In computer science or data science, I could talk all day about how much I love the applications of math. I think it is a super duper broad topic that not a whole lot of people who just kind of take service level math, understand how Mahatha lives in everything we do. And data science is literally how anything gets done. Like literally your app, you need to acquire data to make certain Inc insights or make certain things. Everything.

Anthony Moore 12:44

You know, so right now I'm taking calculus to Physics 195, which is mechanics, black cities class. And later on I'll be taking an education course for cuz. I'm a tutor. And I'll also be taking a dance course up in Linley College in Berkeley. So it's definitely high intensity co semester right now but I my vision is transferred to university of California Berkeley, the mathematics because they have a data science program. So there, I could probably minor in data science and get my concentration in that or computer science, whatever works. But they. Have both really good data science and computer science programs, so I need to really make sure I am prepared for rigorous semesters.

Anthony Moore 13:29

Cuz it's all gonna get harder from here. So it's definitely challenging, but I enjoy a challenge personally. I'm just that kind of person. I like things that are challenging. I'm a little competitive in nature, as in like, if someone does something, I'm fully confident I can do that as well. If I put my mind to it. It's definitely challenging, but I think that I got it. And with enough planning, I can do it. And I can talk all day about, like, how much I love mapping cuz every time I hear. About different pressures were like physics or chemistry or compliance. Like there is so much things you can figure out using math, and it's absolutely nuts. There's sometimes, well, I go, oh, my God, you can do that. It's mad. Broad. So I'm still learning day by day, and I'm excited to see where my journey takes me. But that's my aim on it. They have a career in data science and I wanna graduate from University California Berkeley with the degree Applied Mathematics in the concentration in either Data, Science, computer science.

Question:

If you had to write a college admissions essay on anything you wanted, what would you write it on?

Anthony Moore 14:42

I think. I know it. I would write it, something and. Round persistence and just like the raw hunger. They just want to learn more, want to know more, want to just do better.

Anthony Moore 14:59

There math is all about tenacity, about trying and trying again. And I feel like life is very similar, where things happen and you can't really control it, but you just have a, a desire just to see it through. Through and just to solve whatever is going on. So I think I would connect my love, the mathematics in problem solving to my own life.

Anthony Moore 15:23

As in, like, not everything is going on. I really don't know what I'm looking at either, but I know that I, with enough, like, studying with enough resources gathered, I have the tools to, to solve it and make it happen. I, I, every time I tell, I talk to things about math, they get it wrong once and they get frustrated and they go, oh, I hate this. It's like, no, that's the part of learning. That's life as well. Failure, looking a little stupid, trying new things, right? It's a part of life. And I think I would write it about just persistence. Just keep on getting at it. Don't let failures get you down. Don't let mishaps get you down. Don't let, you know, anything is gonna get you down. That's what life's all about.

Anthony Moore 16:02

I think that's also why I love Mad Cuz it's all about not everyone knows of solution right off the bat. I'll be working on a problem for an hour, but I'll get it. So I think I write it around that just tenacity and in persistence and also just like just leveraging on people, leveraging on your community. Nothing is meant to be done alone. We, we're, we live in a, as a African Americans, we believe in a communalistic type of living. As in like we believe that everything is best done together. And I talk about probably how I relied on other people and select to help me get where I need to be, but also in turn, I lend my own resources. So it's a give and take. Nothing is meant to be done alone. So I probably highlight that as one of my called essay. I thought about this a lot so I can talk about this forever too.

Question:

What's your favorite type of music? I know you said you like Tyler the creator last time.

Anthony Moore 17:15

I can actually I can't quite pinpoint one genre cuz I listen to literally everything. I just, I see Tyler cuz. That was like my high school, dude. Like when I was doing online high school, I didn't really have much like to do or to kind of like people to talk to. I listened like a lot of music entirely was when ours. I actually related to a lot. But if I would say genre. I'd say if overall, probably like abstract hip hop. Like hip hop, but there's not too like normal or maybe with another genre thought into it, like I love jazzy. Pop, any sort of hip hop would like some sort of horn in it or like a jazzy undertone.

Anthony Moore 17:59

Own. Oh, I love that. I love jazz as well. My grandfather is a really big jazz head. I listen to a lot growing up. There's a station at City College called San Diego Jazz 88.3, and I listen to it all through my life, still today. Eh. So anything with jazzy undertones I really love.

Anthony Moore 18:19

I'm slowly getting into rock music. I've always been the rock music, but very surface level, like Metallica and stuff like that. I'm listening to a band. For tool right now. They're really nice. I love them.

Anthony Moore 18:33

Allison changes when I'm listening to as well. I'm just trying to, I'm trying to get more into rock music, but I absolutely love it. Like I said, I play bass, so anytime I listen to a song, I'm like, oh, that's a nice baseline. Typically the rock song that I listen to, but any sort of fusion of genres, any sort of weird, odd like. This sounds like a weird like bridging. It's a machine is like a dude wrapping with metal music in the background. So cool. Any sort of mix like that, but. Abstract kind of music that's a little different than the typical, like, Billboard 100. So actually hip hop, maybe like jazzy undertones, maybe like metal, like wrapping in it. That's kind of what I like right now I can talk about it. About that as well. I'm a big music ad.

Question:

What's your favorite? Do you like to go outside? Do anything in nature, give any hobbies like that?

Anthony Moore 19:34

Sure. I would in the. I mean, I just like taking walks. I think just, it just great for your brain, just. To slow down, just go for a stroll every now and then. Me and my buddies hike every now and then at Cow's Mound, but I think more of as far as active activities. Oh, no, I escape the. Right. I skate pretty often. When I couldn't drive, I would just skate around campus, skate to school. I would hop on the bus and skate. So that's what I did quite a lot beginning of this year. Now I'm driving right now, so I hop up the board for a second just to make everything a little faster.

Anthony Moore 20:12

But to stay active in my meantime, I work out like 3 times a week. I would take pride in physical wellness. I used to be like 300 pounds, so I really cut down on my weight. I'm like 220 right now. And I really try to make sure that I still maintain that way. Wait, a mask? A huge tickler about it. But I just, it just feels nice after you have a good workout.

Anthony Moore 20:34

Last night I ran like two miles, which is probably nothing to a runner, but that is insane for me. I do not run, so I. I make sure I stay active by going to the gym. And every now and then I'll skate or not.

Anthony Moore 20:48

Oh, and I love going to the beach. I love going to the beach. Boogie Born is like soup. I can do that for. I can do that all day for real.

Anthony Moore 21:07

No, I'm a pretty great swimmer. I'm really competitive with that, too.

Question: Did you take Spanish?

Anthony Moore 21:26

I just finish in high school and I just did enough to pass it. Cuz in the high school really wasn't about that, like a plus mentality. So everything that I learn from that when and when they're out of the other, I, some, I could probably recognize some Spanish, but I probably can't tell you anything in it.

Question:

Okay. What do you look for in relationships?

Anthony Moore 21:56

I think in relationships, I just look for someone they share my life with. And I feel like a lot of people don't look for that at the moment. From what I can see, a lot of people kind of are just looking for someone. To complete them. And I don't really agree with that. And I, I don't, I don't really think that you need, you should look for someone to complete you, rather just complete yourself and then look for someone who, who you would see as a compliment to your life or who you can in share your life with right now, I'm talking to a few people, but I'm not too serious because I'm still kind of working on myself. But also, like I said, trying to go to Berkeley, so. I think I'm just looking for someone to share my life with. But I don't think it should get to the point to where it's like, I'm not complete if I don't have a per I'm looking for someone compliments my life and has emotional intelligence. That's a huge thing. You have to be. You

have to be emotionally smart. I need someone who is rather empathetic and get a understanding emotions and feelings, cuz. Is that's where Rachel are built off of, our emotions. And I need someone who is pretty mature in that nature. And I just someone to share my life with and someone who's emotionally intelligent and also has their own life.

Anthony Moore 23:19

I need, I want to see what you got going on. I don't wanna just, I want, I don't want my life to be in relationship. I'm saying I wanted to be a highlight of my life. But I also I have this over here, so I need us both to have something going on and we rather like, I guess, accomplished in a sense.

Question:

f you were to ever be a parent, which I don't know if that's what you wanna do, but how do you think? You're like, parenting skills be.

Anthony Moore 23:48

I think that. I think I definitely wanna be a parent. I think it depends if. It depends on. I know that if I have a daughter, I. She'd probably, like, push me over and I. She'd get anything she wanted out of me. I know that there, if I had a daughter, she would like get anything she wanted out of me. I would love to have a daughter. I think I'm not a son. I'd see him. I'd also I it'll get okay. Anything like small defense? List like Charles me apart.

Anthony Moore 24:26

But I think if I had a son, I probably want to just teach him in daughter to both of my guess this, I want to just teach them how to be a good human, as in just how to.

Anthony Moore 24:39

Have good values. How to not be pessimistic? Being optimistic. I want them to be like, I feel like it's so cool nowadays to be like negative. And I want, really want my kids to see the good things and then really enjoy their selves in life and also just be free to be whoever, they wanna be. So I think I just, I'd be a pretty chill parent, but it also, like I hold them accountable for things that I just make sure they're on the right track. Do what you want, be he wanna be. Just be a good person and try the best you can.

Anthony Moore 25:15

But I think I love it. I, I'd be, I think about all time, I'd be like the best at ever. I'd be like to miss it ever but I just let my kids do what they want, but be who they want to be.

Question:

Where would you wanna live?

Anthony Moore 25:27

But just be a good person. Don't doing things stupid. Don't do drugs. Staying in school and just do something that you love that would keep you off the streets, but.

Anthony Moore 25:56

I really enjoyed in Berkeley, like the weather, like it's like. Kind of like Foresty and a little more cool than San Diego. Almost like a overcast, I guess the states miss. Like that'd be nice. Not like Woodland states or that's a cities with like, I guess like an overcast. Ish type tone. I don't really think about that too much, honestly. I just know I.

Anthony Moore 26:19

I'd probably like where I'd stay location wise, this is somewhere like my kids could grow up in. I'd want them to be around a certain black population cuz I. Why do I want them to be in tune with themselves but also have a lot of like, other diverse cultures and at ethnicities to be around? You have to live with every kind, all kinds of people. But I'd want them to also be in a location to where they can have black friends, they can go to a school with a good but population. So I never really think about that, though, but probably just a nice place with nice weather. Is somewhere they can live and be safe.

Question:

If you could start in a TV show, it would be.

Anthony Moore 27:12

This kind of TV show would be it's a good one. I'm gonna like. Let me think. I don't wanna like dirt out or anything. Let me think about this. I can start a TV show would be. I think like I would love to be. In like a documentary. I think research is like a big thing in my career that I wanna do. So I would love to be like.

Anthony Moore 27:45

And one of those probably like documentary related to, of course, math or like computer science, some like that. There's documentary. Netflix called them the Great Hack. And then slide. They're talking about the 2020 election in a Cambridge Analytica, the a data that like a data processing company and kind of how like the good fraudulent in the election. And I think that there's like the main dude, like, I think the way he's kind of. Like put in that, I guess, documentary is kind of cool. It's like a documentary, like following like the actual story, but it's like he's the one who's piecing it together and everything. So probably something like that. I think that'd be kind of cool, some sort of documentary, anything like anything.

Question:

Do you like documentaries?

Anthony Moore 28:34

It depends on what it is really. There's just certain topics and something that I'm just super interested. Then I guess anything but these science in my computer science, anything about like cognitive science like neuroscience I'm really into. I really enjoy those like.

Anthony Moore 28:50

The old dude, like speaking about penguins or some stuff. I'm talking about like that Geo you don't talk about. He is like a certain voice. Like stuff like that. I think that'd be that. Those are cool documentaries that I like to turn on every now and then. Just watch.

Question:

What's your dream car?

Anthony Moore 29:18

Dream car. Another thing I don't think about too much. I think as long as it gets me from point eight to point B, it's cool. I think definitely when I get older, I have a bit more money and I'll be able to spend something on something nice. But I really like, if I were. Oh, if I were, like, to buy a few cars just cuz I had money, why not? No, probably it's, I think it's a BMW M3, like. It's a. It's like a vintage car that. I think it's like a 1991 or something like that. It looks really cool. Really nice. It's like another one similar to it, like the Ford RS two hundred. It's like a vintage sports car, like any type of car that looks like that, like old but like I'm like a common Jerry Gold, but I guess like 1990 like sports car. They're kind of cool. So I probably like look into that type of category of car and see which one just kind of look cool.

Question:

what's your favorite color?

Anthony Moore 30:43

I hate saying this cuz it's a such a like, it's not really color. I just, I like black is a nice color, especially when it comes to clothing. It just, it's a super simple color. It goes with most things. It's not, it's not like. It's just black. But I if other than that, I like gold a lot, like black and gold is pretty nice. Blue is a great color. It's simple for like that black blue gold. I like green a lot, only cuz, like, not the actual green color, but like. Like you're saying like a force like how like nice and lush it looks like the greenery, like green, brown, like those are nice colors. But I. Let's say two. Probably like black and gold. Black gold or maybe blue.

Question:

Do you like jewelry?

Anthony Moore 31:37

I were like, bracelets? These are tiger eyes. People who are super in the chocolate. Would like master me if I butcher this, but these are tiger I talk was there like, I forgot what area of it, but like some people believe in chalk words going from your forehead to your like growing like knees area. And tiger eyes kind of like are for confidence and inner power. And I just the people say that you were on your left arm just to kind of activate the chakra. You wear whatever your. Lacking, and I don't really believe in it, but I think it's kind of cool. The cool meeting. So I wear that. I just, I have this band on that this. It literally means nothing, but it's. I got this from. As you know, it doesn't. I got this from when I was in my study abroad from Africa, and it's really faded. It's all it, but it says tagali memorial remembrance. And it's cuz the Rwandan genocide and there is a memorial for the genocide in Kigali, which is to capital Rwanda. And just a little gift shop that I got a few nicknaps from. I just, I got this ban. I just never stop wearing it ever since.

Question:

Do you get any other things when you're there?

Anthony Moore 32:55

I have this, like, I have this little pendant on my backpack. It's like this little gold pendant. It says Umbo and Ubuntu was a proverb, like an African proverb that means like humanity, like togetherness. And it's roughly translate to like I am because of who we're. And it just, it's this, like I mentioned earlier, people who are from part of Africa asperate. But they believe in communitalism. So Bundu is the problem. That means we're better together and we're connected as humans, like every one of us, like as.

Anthony Moore 33:34

Thing humans means we were all interlinked somehow so I guess the good answer to keep on to, I have like a couple, like just a key chains of my backpack. This is like a. This one's a. This one says error. I think it says E. It just means welcome to our. Home. I got that from Rwanda. And this is? This is from the. Forgot what the mountains were, right? Rwanda is famous for this one mountain. But you can go there and just see gorillas, like just no truck, nothing. Like just gorillas walking in front of you.

Anthony Moore 34:13

It. It's pretty, it's pretty dangerous. He like, it's pretty scary, really, would just walk up to you like thousand pound creature, like rip you and. But I forgot all. But there's a certain. Number one, he was.

Adrina 34:33

Those animals come to your car and you, like, feed them.

Anthony Moore 34:36

There was a national Park when we went to. Oh, my God, it's slipping. My it's slipping. I'm looking for the name of it. The national park. It's called the. I'm a blubber right now. It's super big. It takes like 12 hours to go through up and down. And it's a safari park and it's like drafts, like elephants. Allegedly some lines in there, but we were there for like six hours and there was no line. But like Gazelle and stuff like that, the park was called. But it's like this big national park and you can go there and see. Found it. You can go there and see the.

Anthony Moore 35:19

The animals, aka Gara, the aka Gear National Park in Rwanda I it's in Rwanda, but it's so big that it borders Tanzania. Like it's huge. But I've been to one of those before.

Adrina 35:37

I wanna go to that. That sounds cool.

Anthony Moore 35:40

It's pretty awesome. But it's, you gotta be patient. Like I said, like six hours we saw like, you saw a lot of animals. But don't go bed not seeing a lion, cuz they're, it's like three of them in there.

Question:

Are you a dog or cat person?

Anthony Moore 35:59

Definitely dog person. I love my big dogs. I love like. Okay. I'm a dog person, but any dog that's classified as a small dog, I just don't like. They talk too much. They complain a lot. I have.

Anthony Moore 36:13

I've had three dogs my whole life. Well, I have four. We have one called Ponio. She's a little Maltese poodle, but she's really my sister's dog. But I've had three dogs my whole life, Kita, Kuma and grizzly, and they're all named after bears grizzly is my dog right now. And he just, he's a big American. Edfordshire rottweiler mix. And I just love big dogs. There's just kind of, they're kind of just chill creatures. They're really nice and caring. They don't make too much noise. They don't complain a whole lot. They're just really lovable and cuddly creatures. And despite how big they are, they're super sweet.

Anthony Moore 36:49

I love big dogs. I think like babies and dogs. Like a dog can get anything out of me, like if he knew how to. I love dogs so much of a big one, of course. Small ones. Some of them are cool. This a lot of make no.

Question:

If you were a dog, what kind of dog would you be?

Anthony Moore 37:15

Probably be like a Saint Bernard or like. Like a Cane Corso or Saint Bernard. I think zebra just kind of really cuddly. I. I think they just, they're super big dudes, but they don't really, they don't really, they don't like they'd heard much. King Corsos would hurt somebody, I think. But they just kind of seem like they're chill. To that, kind of like how they just only look like cool dogs. I don't think I would be a cool dog if I was a dog.

Question:

1. Have you turned 21 yet? Okay.

Anthony Moore 37:56

I'm nineteen.

Question:

But what is your ideal 21st birthday look like?

Anthony Moore 38:12

I'm keep really to. You? I'm not too huge on birthdays. Like if I get a cake. Imagine. To get like a high five, I'm cool.

Anthony Moore 38:25

I'm cool. When you gonna have cool I don't, I'm not too huge and extravagant like, oh my God, birthday. I'm, I don't know. I'm not too big on it. So if I just get a cake happy birthday, I'm gonna get my new, I'm gonna get my new ID and I probably might not even use it cuz I don't really, I'm not too big on drinking. Like, I don't. No, I think that it's taste like rubbing alcohol. And I don't know why I take. I drink that. Willingly, but.

Question:

did you wanna go travel somewhere with your friends or go somewhere, let's say?

Anthony Moore 39:01

Oh, not for my birthday. Looking the data. I'm well. But for my birthday, just get a small little cake, sis. Show my sisters for a day and get back to it none of them.

Question:

What's your favorite social media?

Anthony Moore 39:31

I mean, like, I try. To say I hope social media. Why I find I. If I were to say them, they use the most how we Instagram or YouTube I think that I'm slowly realizing how kind of time consuming those apps are and kind of how like bad. That it can be for you mentally to kind of always see everyone's like, you always just see everyone's best life. Like this is the best things in their life. It's not how life is. Life has UPS and downs, ebbs and flows. In Instagram, we really highlights the best part people's lives. And people compare themselves other people all the time. So. I just, I use it every now and then. Just, they connect with my friends. But I try to say off of it, YouTube is just cuz my favorite creators are on there. So every now and then I'll just watch some YouTube. But I try to see after social media apps a lot.

Question:

Are you more of like a comedy movie kind to person or like a emotional movie? If you had choose.

Anthony Moore 40:43

That's a good one, definitely comedy. I like a good laugh. I like a good laugh. But also, I also enjoy like. Emotion because they're a bit more like existential. They make you think a little more about what's going on, but also just like a good laugh.

Anthony Moore 41:03

Like if I'm turning on a movie, I probably just want a good laugh. I was there. Always a good joy. I like rookie Bobby a lot. That's a really funny movie. The all the Fridays are super funny. They can quote all the Fridays probably. I watch them so many times growing up. I was gonna find a little movie once on the tip of my tongue. I'm not quite grasping it. On. My gosh, it's not a movie, but it's the Eric Andre show is super. I love that show so much. It is. It's such a stupid way of. It's just stupid comedy, but it's kind of my kind of comedy, so I like a good laugh. Like, I like a good chuckle. It's good for the soul.

Question:

Are you more of a handwritten type note or online type note?

Anthony Moore 42:06

That's really funny how you just ask that. Cuz I just, I was just given an iPad by my buddy. Cuz I went through like 20 notebooks so far. Like I'm killing a lot of trees. So I was like, let me make sh. Let me try to find an alternative to take notes. So my buddy gave me her iPad. She had a new one, and I got good notes on it. And I'm actually really enjoying it. I think I probably prefer, like, the iPad notes with the pen. Something about it, like, makes it stick more with me. I don't know. It's just something about the way, like writing on the screen and you can kind of open all the photos really quickly. You don't have to go flipping page by page. You can just have make a new

file. I don't know something about digital notes, but also being able to still write down on it is probably like this might be my new way of taking notes for now on. Through the iPad. The plan.

Question:

What's the hardest class you've taken so far?

Anthony Moore 43:15

Of horizontal I've completed so far probably has been my Java programming class in spring. That was a challenging a to obtain. I was, I was, I get, I strive for master whenever I do. So I tried it my best to get my. Is I haven't failed yet, but that a was super challenging cuz I was literally looking at my grade, like, can I just not do this last project and still get my a? Much project was so hard that I was like, my grade is so good, I'm just gonna opt to not do it. And I finish with like a 91%. I was like, oh, my God, that was a really challenging class. As programming for the first time in a language like Java is super trick.

Anthony Moore 43:59

Especially when there's deadlines for the assignments but honestly, like, look, the way things looking right now with this physics class, this might be the article I've taken in a while. This is really like, this is a lot. This business class supplied math and a lot of, just like you have to know, a lot of facts and a lot of like. Just like concrete things, like no one would just know the acceleration, the gravity top of their head. No one knows that it's negatively meter squared. No one knows that. You have to know that as a physicist. So this is definitely probably the hardest I've taken so far, but as is the one I completed definitely my job of class back in the spring.

Question:

Are you a coffee person?

Anthony Moore 45:07

I say so. I'm not taking it every day, but when the semester gets started and it's like, I'm a little groggy, I named me at. Nice cup of coffee. I wouldn't say I'm a coffee person. I just see as a tool every now and then to kind of get me going. And the way I wake up, though, in the morning is I just take cold showers. It activates your I think it's called your parasympathetic nervous. System where it's like you're kind of fight or flight, like your alert nervous system. So when you hop in a cold shower, like cold water, you kind of, you do a really large exhale. So it's kind of hard wake up in the morning. Like it really, it shocks me awake and I feel good the entire day. But every now and then I'll use coffee to. I use coffee to wake me up a little more.

Anthony Moore 46:02

It's definitely something you had to ease into online. Like the first like week or two, me doing a way, I can't do this. But you'll get used to the climate. It's it's it.

Question:

So you take like freezing cold? It's like freezing cold.

Anthony Moore 46:15

Oh my rule of thumb is if this, if the mirrors are like steamed when I get out the shower, I, it was too hot. So I. It needs to be like freezing cold.

Anthony Moore 46:32

Just a. It's a challenge you gotta get in.

Anthony Moore 46:42

You gotta just don't think about it. You guys walk in there, it's like going to the really early, like the water is freezing cold.

Anthony Moore 46:48

Just gotta go in there. Just don't even think about it. Just walk in there, you're regular.

Adrina 47:04

When you take a warm shower and then you get into click clean sheets, that's like my favorite feeling.

Anthony Moore 47:09

But you feel tired afterwards. I don't know. Me present, I feel tired after a hot shower. I'm ready to lay down I just don't take hot touch number, cuz.

Adrina 47:14

I feel like maybe cold shower in the morning and then hot shower at night. Is that live?

Anthony Moore 47:21

If I take a hot shower, I'm used to it again. Oh, you see, the hotness thing.

Adrina 47:25

That's crazy. I could not.

Question:

Are you a gift giver?

Anthony Moore 47:41

And I mean it. Like if I didn't, if I think you deserve a gift or you need one, like if it's your birthday and no one's doing anything, I'm gonna go out there and get you a gift. That's kind of like how I am. But I think that's not really like my love language or anything. It's like this a way I like, like my sister, she had a birthday last week and she's like, oh, I don't want to do anything. Like now I'm gonna go buy you a cake. I'm gonna buy you a video game. I'm gonna buy like though, that's just, that's a gift giving.

Anthony Moore 48:11

Like you need a gift for that, like, come on. Right. But I think I'm more of like a affirmations person. Like, you can do it. Hey, you're having a bad day. Come speak to me. I think I'm more of a, of a, I guess, an emotional investing person than a gift giver.

Question:

What would you consider your style as, like your clothing style?

Anthony Moore 48:38

I just, okay, so again, I think she don't really have a, let me think about this. There were a lot of things so I always wear vans or flat footed shoes. I don't like air maxes. I think they just. They. Just they make me look weird. Look, I can't quite describe it. Like, I look pretty typical, like more normal in a flat footed shoe, like a van. I always wear jeans or slacks or cargo pants. And maybe I'll wear like a black shirt or a s like a jacket or a button up, a like a button up on my Ards Wear T-shirt. Maybe I'll wear a hoodie, like anything, like vans, like pants and like top, so. Kind of like skater ish. I try to appear like that. I actually do skate, but I'm not like a crazy, like, trickster skater. I just like the cruise around, but. I do. I appreciate the kind of this, the practical style they use. But escape. I just, like, wear vans and pants. I don't really wear shorts like that unless I'm going to the gym. I don't really think about my clothes too much. For me, like, a clothes, they work, but also like looking nice but not presentable, but like. Not like thinking about my style too much.
