| **Basic Information** | name | Anthony Moore |
| | gender | Male |
| | height | 6 ft |
| | weight | 180 |
| | Measurements | N/a |
| | age | 20 |
| **life memory** | childhood | I grew up in a small household with not much support. I did not pay attention much in school but ended up focusing and raising my grades. My goal was always to get into college. |
| | primary school stage | In elementary, I was very social and had many friends. I got along with my teachers and friends. I would play outside of my house. |
| | Junior high school stage | The junior high school stage is an important period for character shaping. I may experience self-awareness, the establishment of values, |
| | high school stage | High school was fun.. In the evening, I have to do homework and prepare for exams. The teachers always emphasize the need to study hard and strive to go to a first-class university. At junior college I found a support group that helped me prepare for university |
| | college stage | I found a good routine in college and became very consistent with my schoolwork. I started to enjoy school which was a new feeling for me. I began to ask professors and other students questions to learn how to be successful. |
| | stage of love | I am not in a relationship but very respectful to boys and girls |
| | stage of unemployment | I worked at the local shoe store. Often taking the bus but was able to support my family |
| | working stage | The only difficult thing about work was working with others and transportation other than that I was excited to start making money. |
